
Sacred Network

A platform designed to
bring spiritually minded people together
for the good of humanity, the living planet
and all sentient beings.

It is time to begin gathering once again, to share
our experiences, our dreams and our insights.

Whilst many have moved toward division, a growing few are
realising the need to come together again to unify
under a greater vision for humanity.

It is said that we are evolving from individualised
consciousness to group consciousness.

Only by joining together will we come to understand
just what this means and how each of us
has a role to play in this unfolding story.

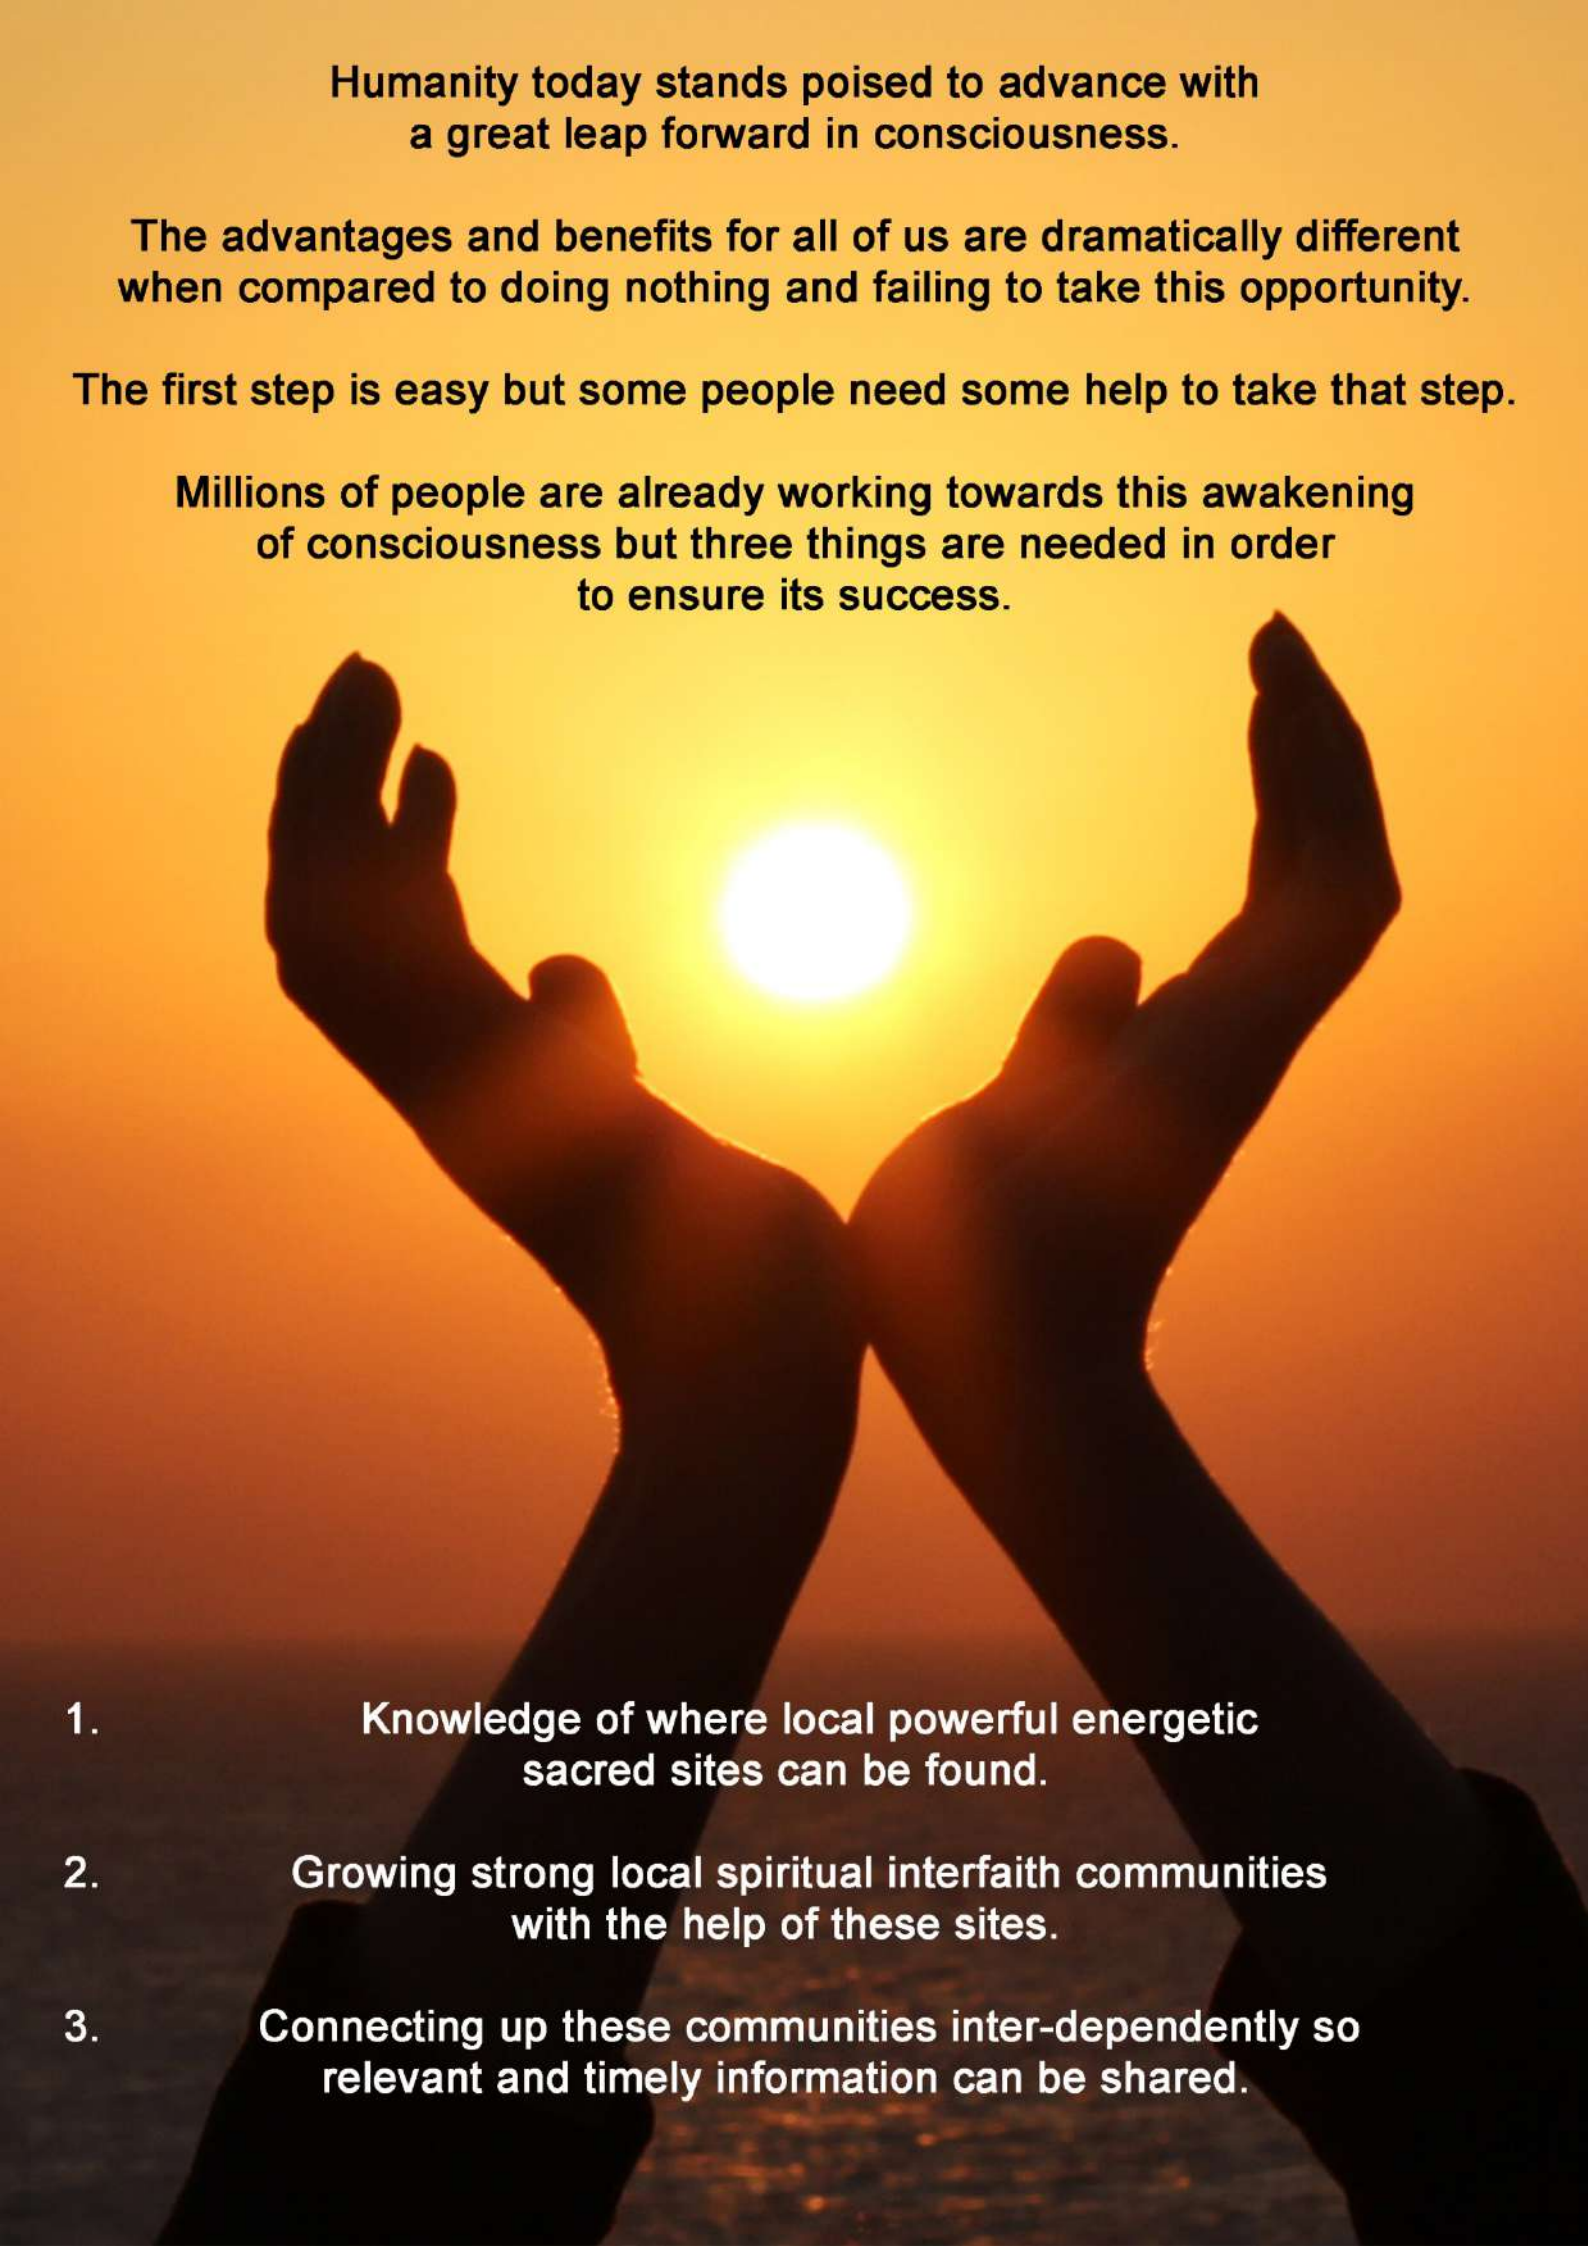
A specific functional online platform is needed that both
enables and facilitates this so groups can form
in new inter-dependent ways.

Humanity today stands poised to advance with
a great leap forward in consciousness.

The advantages and benefits for all of us are dramatically different
when compared to doing nothing and failing to take this opportunity.

The first step is easy but some people need some help to take that step.

Millions of people are already working towards this awakening
of consciousness but three things are needed in order
to ensure its success.



1. Knowledge of where local powerful energetic
sacred sites can be found.

2. Growing strong local spiritual interfaith communities
with the help of these sites.

3. Connecting up these communities inter-dependently so
relevant and timely information can be shared.

When you join the Sacred Network you will have a voice in the community and be able to locate sacred sites nearest to you.

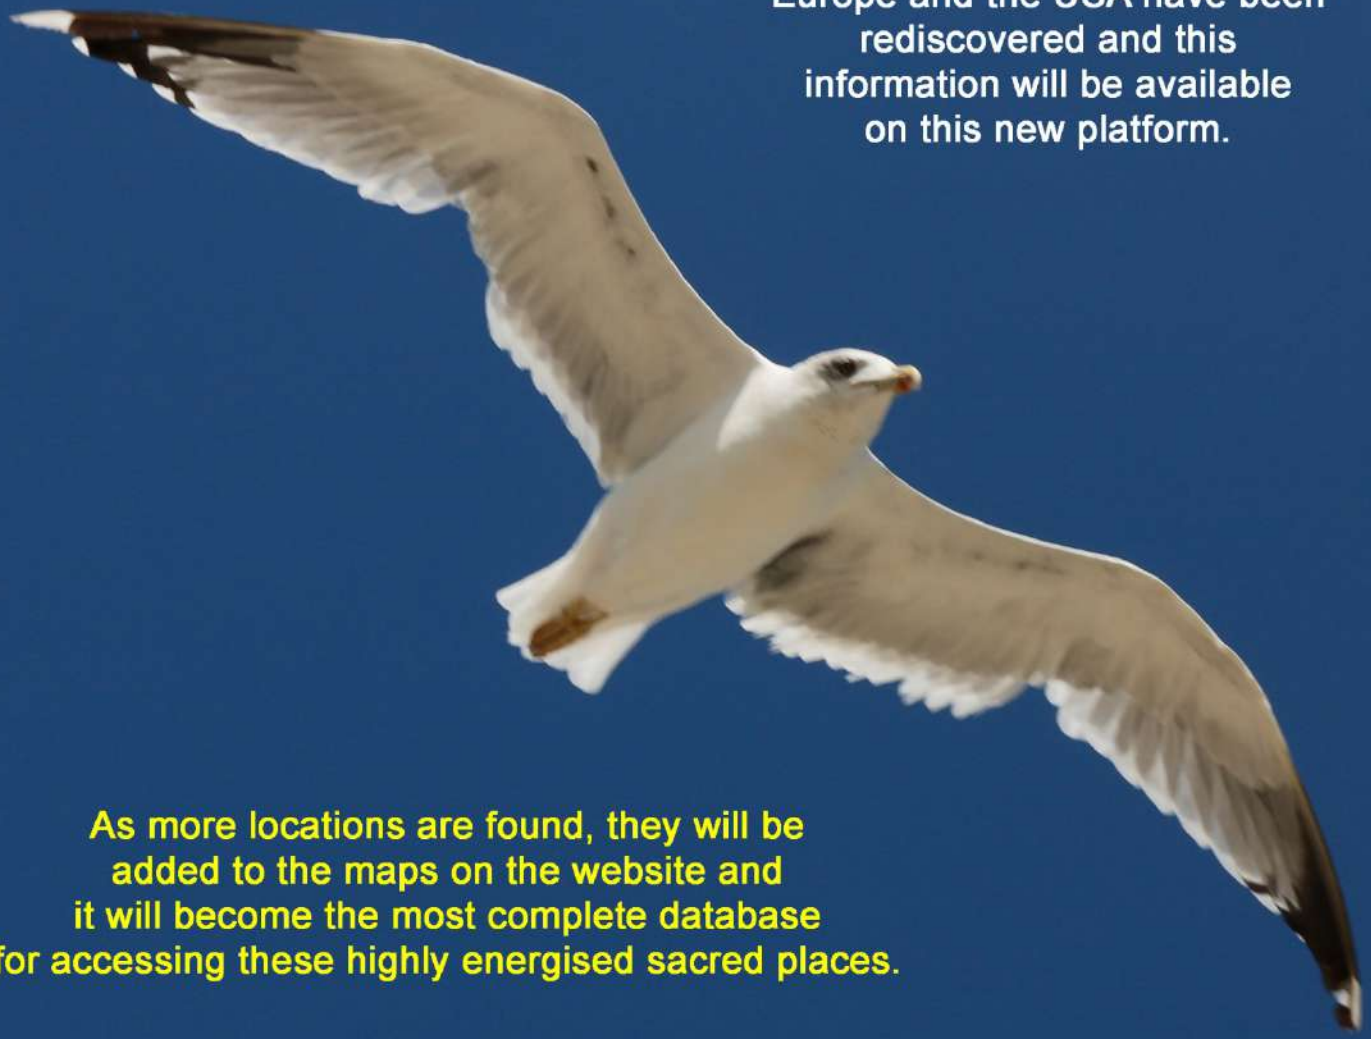
You can find and connect with groups that are already forming at these sites.

There will also be groups for online meditations, as well as online discussion groups for dreams and spiritual development.

Anyone can start and promote new and existing meditation and discussion groups that others can join.

This platform will be a place that also helps you grow your own local and online groups.

Hundreds of strong sacred sites across Europe and the USA have been rediscovered and this information will be available on this new platform.



As more locations are found, they will be added to the maps on the website and it will become the most complete database for accessing these highly energised sacred places.

Opportunity

We have the opportunity here to come together as one human race whilst keeping our unique identities, cultural beliefs and freedoms.

We have the opportunity to end all wars, create peace & evolve everyone to a higher level of human consciousness.

This opportunity has arisen because of a changing energetic environment that is increasing innate abilities, like empathy and telepathy that have been dormant for centuries.

We have the opportunity to help others in ways that have not been open to us before.

We have the opportunity to look closer at the true nature of reality & to share information that will bring comfort to people by providing them with a far greater hope for the future.

Decentralised groups sharing these truths will become an unstoppable creative force for positive change.

The challenges that now face us

Humanity has never been so divided. Increased negativity is leading to further separation and violence.

Those people unaware of the increasing energetic environment are having difficulty understanding what is happening to them mentally.

This division and this mental instability have led to huge numbers of people living in poverty, despair and loneliness.

Repetitive false narratives over the centuries, have led many people to become entranced into accepting an incorrect nature of reality.

Spiritual knowledge can reverse this situation but so much has been obscured that the challenge we now face is to search for the truth in new ways.

Group discussions held respectfully around a variety of relevant subjects is proving that there is a way forward - if we learn to recognise the importance of our different skills and innate abilities.

This challenge of working in groups is probably the only way forward as we progress into the next cycle of group consciousness.

The decreasing and increasing energies that drive these long term cycles, now presents us with the chance to turn these challenges into a wonderful opportunity.

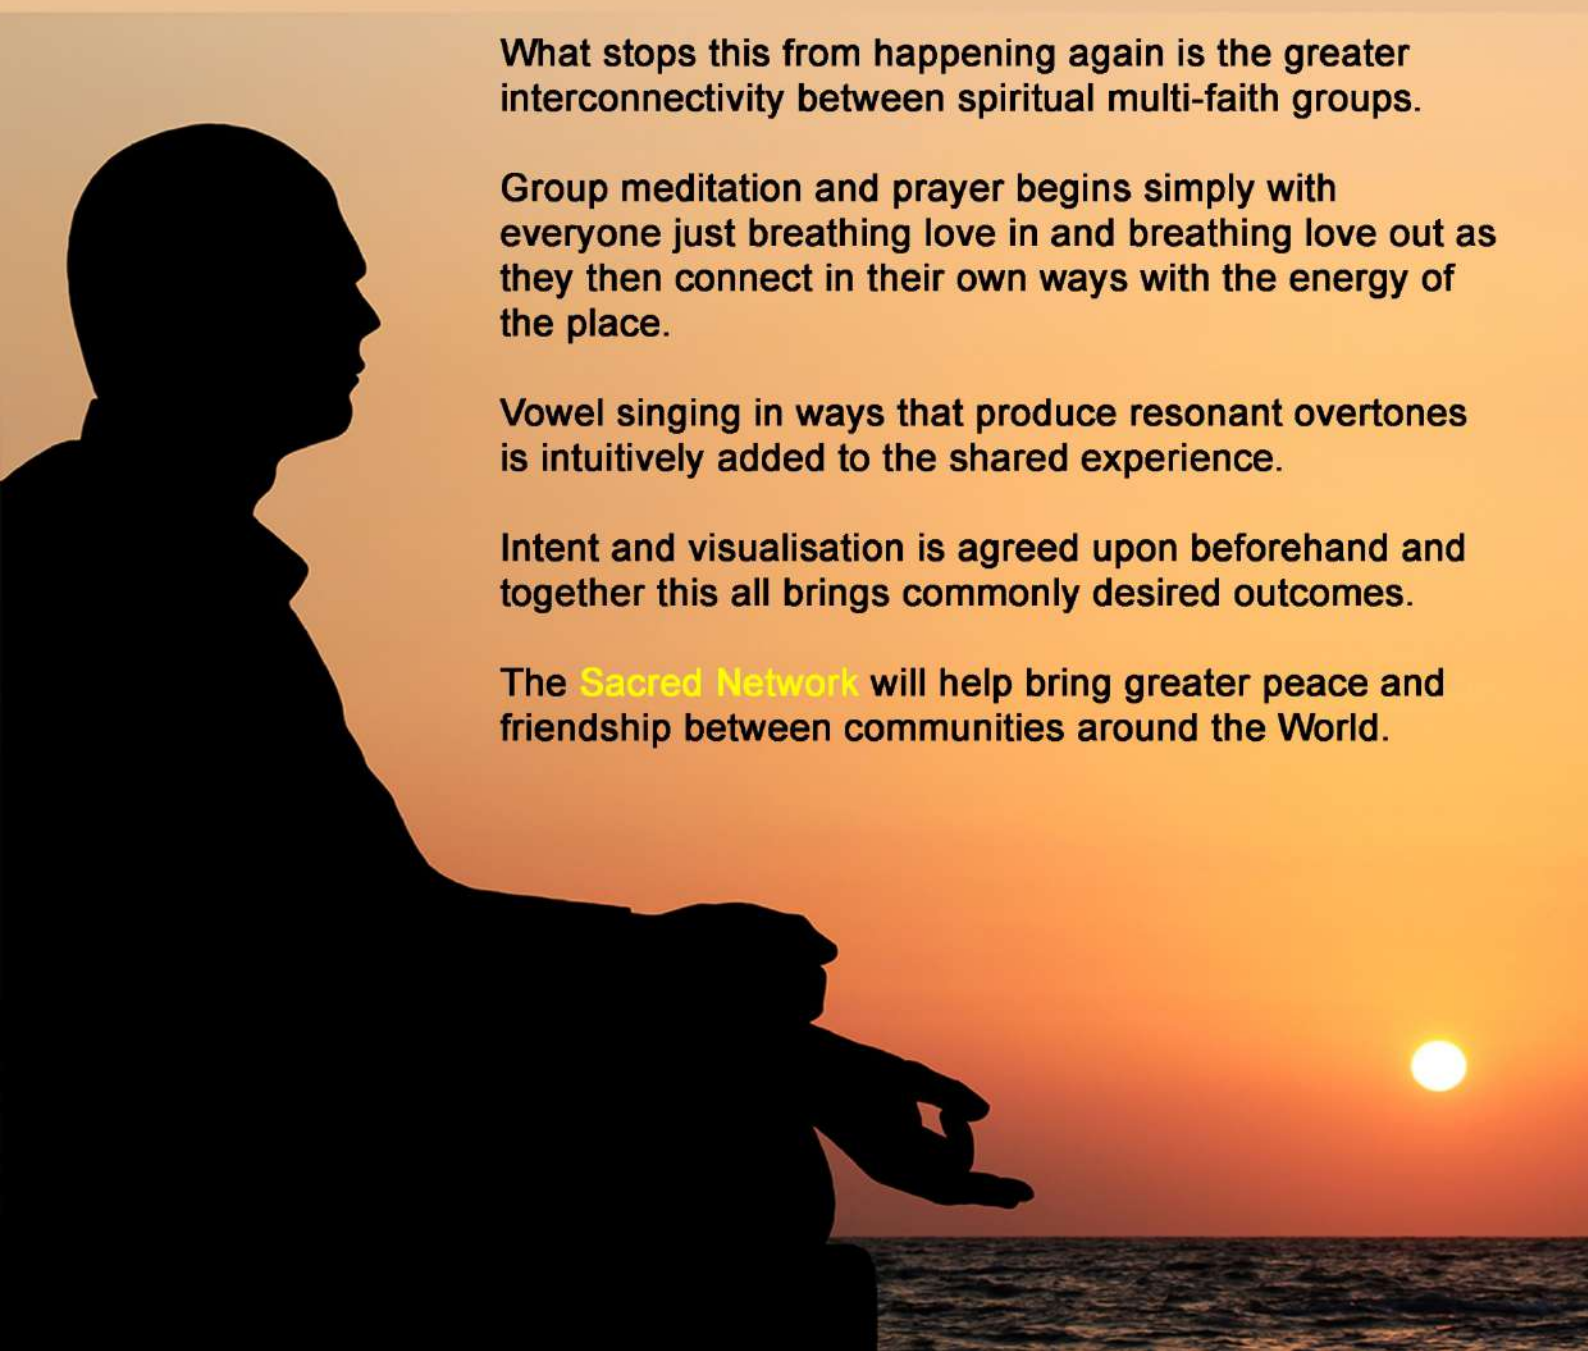
A Proposed Solution

A decentralised interconnected and interdependent online platform is needed to help grow local spiritual multi-faith communities around a sacred site where gatherings can occur and we invite you to join us and spread the vision.

An important part of this solution is that communities are aware of other communities and what they are doing so the platform will enable online groups to form where public and private group discussions can take place.

When individuals unite within inter-faith groups, they become stronger and more able to help one another within the group.

In the past when religious communities expanded, it threatened different religious groups. Leaders saw each other as enemies and battles were fought over land and whose God was more powerful.



What stops this from happening again is the greater interconnectivity between spiritual multi-faith groups.

Group meditation and prayer begins simply with everyone just breathing love in and breathing love out as they then connect in their own ways with the energy of the place.

Vowel singing in ways that produce resonant overtones is intuitively added to the shared experience.

Intent and visualisation is agreed upon beforehand and together this all brings commonly desired outcomes.

The Sacred Network will help bring greater peace and friendship between communities around the World.

There are millions of people Worldwide who meditate and pray. Most of these people do so at sites that are not energetically powerful.

The Sacred Network aims to bring together open-minded, moderate-thinking, spiritual people at powerful energetic sites where they can connect to Source.

There is a growing number of people who are aware of a coming evolution of consciousness. They too are seeking to gather at energetic sacred sites near to where they live.

There is also a growing number of people who are searching for the truth who wish to share what they are discovering. These people are choosing ways that allow for freedom and decentralisation rather than control and centralisation.

The Sacred Network will be a place where everyone will honor what each person experiences, sees and feels, as we realize that each person will have unique insights and experiences.

Group pages will enable people to share dreams, visions, sensations and other spiritual experiences. This shared learning will boost humanity's evolution.

There are a few online platforms that aim for similar interconnectivity but none of them can do all three of the following:-

1. Provide knowledge of where local powerful energetic sacred sites can be found.
2. Enable strong local spiritual interfaith communities to grow near to these sites.
3. Help connect up these all local communities in an inter-dependent way.

For People Willing to Invest Time, Money & Energy into the Sacred Network:-

A database exists of over 3000 people worldwide who are now currently aware of the need to gather to meditate at sacred sites during harmony times.

Many of these people are willing to spread news of this project via their own networks. Their total audience who are interested in knowing more about this coming evolution of consciousness is estimated at over a million people.

Currently over 300 accessible, symmetrical and strong energy centres have been identified around the World. More are continually being rediscovered and will be added to the website. This will produce an on-going interest in the website.

Anyone will be able to start and publicise their group meditations at these sites and will be able to attract members to their online events so they can expand their network.

The website will enable members to start open and private groups so they can share information with each other.

Total privacy will be achieved through the hosting of the website on a decentralised encrypted private network. This means that no third party will be able to shut this down.

The project will have good visible metrics with measurable numbers of sites, members, events run and group facilitator levels and numbers. This will enable the right focus in the right areas to ensure the projects success.

The website is being built by experienced web designers who are aligned with the same vision for this project.

Financial sustainability for the website will be achieved through a booking and payment systems designed just to help the facilitators of online discussion groups earn a sustainable income whilst running their discussion modules. With donations, it will ensure there is no need to sell data or advertising.

Over 150 hours of group discussion modules have already been prepared for anyone interested in building or working in groups either locally or online. Having done these modules, you will be able to go on and run them yourself and earn an income from that.

These modules have been trialled and tested for over a year now in preparation for this website. Guidebooks will enable anyone to become a good facilitator, run these discussions and help prepare people for our evolution of consciousness.

Synchronicity, Prophecy, Individuation, Earth energy interaction, Group meditation and studying the relevant work of great men from the past like Rudolf Steiner and Carl Jung are just some of the subjects included in these modules.

More modules will be created and added over time by the facilitators from their own research which will also bringing them greater financial benefit.

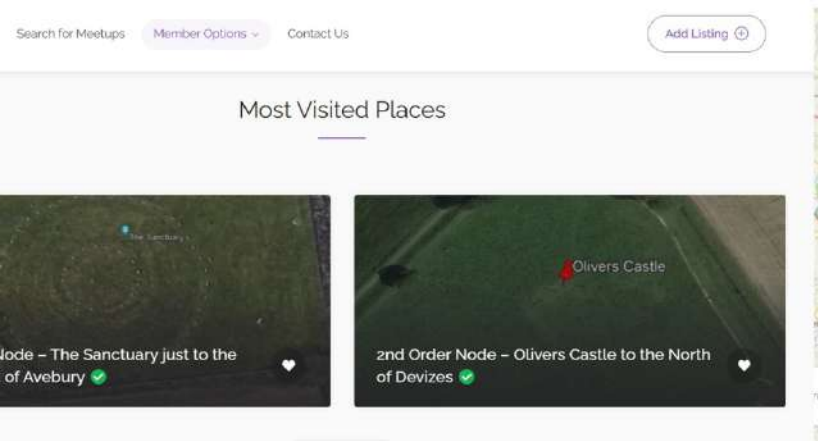
The images on this and the next page show examples from selected software providers of how the interactive website will look and function.

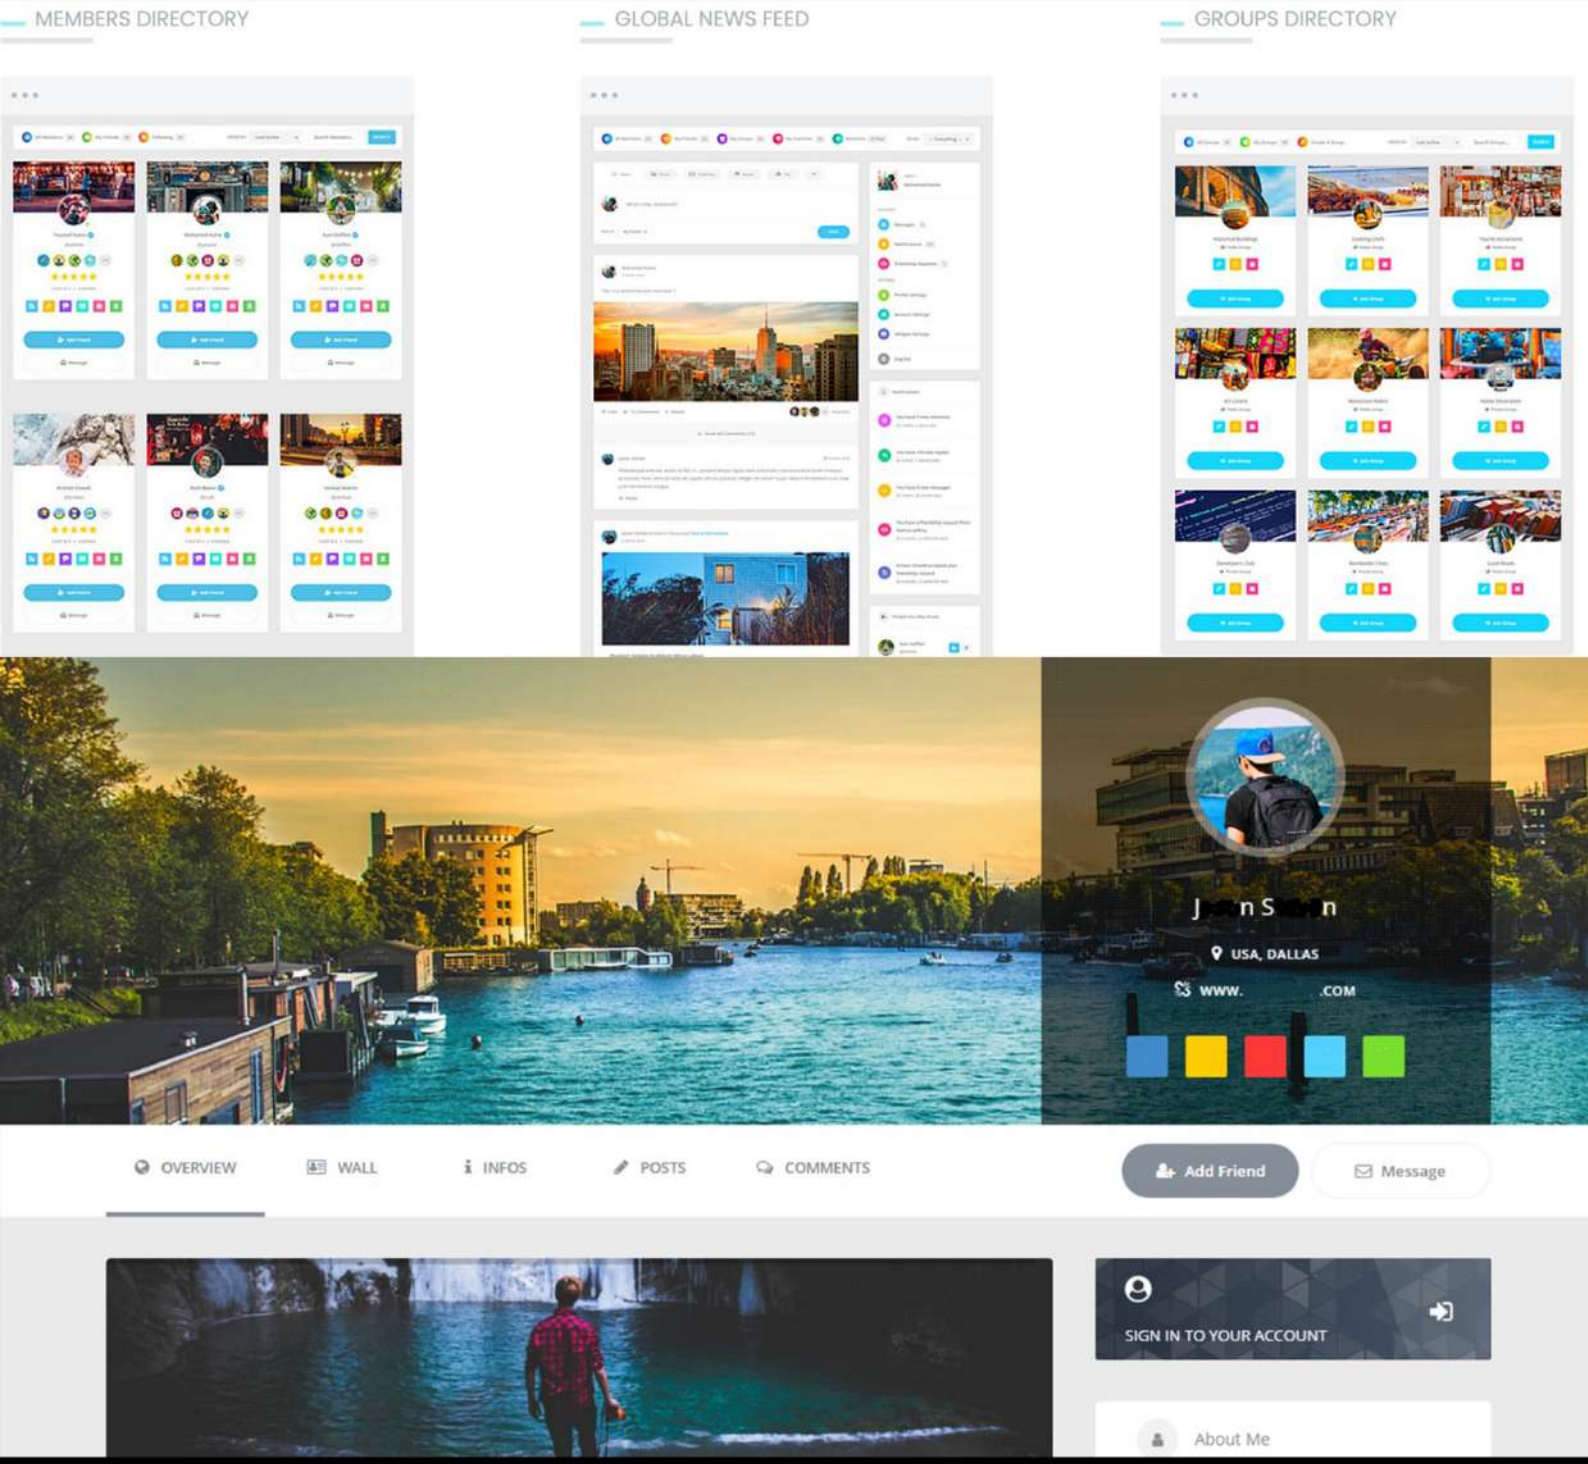
A simple two step plan is now envisaged:-

1. Raise initial money to just build the website and then place it into a basic charitable trust whilst finding a team of 8 trustees that will help to design, promote, grow and develop the aims of the trust.

2. Register the trust so that much larger funds can be raised to help expand website participation and to go on and develop key spiritual multi-faith sites around the World.

If you would like to become one of the 8 trustees, preference will have to be given to those with applicable skill sets and to those who would like to make larger donations.





The above is shown to give you an example of one version of a members page and what access to the group pages will look like. Below shows the Edge network home page that will be hosting the new website.

How It Works

Help is now needed

Some donations have come in for the initial cost but we need a minimum of £10,000.

This is the amount needed to complete the first step. The initial cost break down for this first step is for:-

Design, Artwork, Scoping documentation, Installation, Functional front and back end configuration, User documentation, Post configuration functional & front end amendments, Page content installation and the setting up of a registered charitable trust.

Minimum donations do need to be £25

All initial donors will be given the advantage of a minimum one month early membership to the website and will be part of a closed lifetime member group.

All initial donations of more than £100 will have access to preferential discounted rates on the initial group discussion modules.

All initial donations of significantly higher amounts will be considered for a position of the 8 potential trustees needed to sit on the board of trust.

Please contact us separately for donations of over £1000.

Please click here to be taken to a donate button on the home page of the www.roryduff.com website.
