

## October 2019 Newsletter

Thank you all for your continued interest in my research. This newsletter continues in the same theme as the last with updates in the variety of areas that I have listed below.

### 1. Earth Energy news

A couple of incidences have occurred this month which I feel I need to draw your attention to. As some of you will know, I have produced a first ever classification of Leylines, Earth Energies and Nodes and I split Earth Energies into two groups based on their underlying nature. One being more closely linked to Electromagnetic energies; the other low frequency sound energies. In the former group we find the Hartmann/ Curry lines and the Benker lines. These are very common and the lines are found to form a grid pattern across the landscape. The H/C grid are lines with are only a few inches in width and which are spaced out by around a meter apart from each other. This distance varies slightly though and you can find the grid in a tighter denser pattern in some areas and in other areas the lines are all slightly wider apart and the grid is less dense. The same is true for the slightly wider lines that make up the Benker Grid. These lines are about 7-10 meters apart and can be around 2-4 feet in width.

These Benker lines are therefore also quite common and it is fairly often you will find them running though where people live. Ordinarily, in the past, most people have lived on these lines reasonably well. Where these lines cross over though, intensifies the electromagnetic energies in that area, and this is where some difficulties have arisen. Two things have changed though recently. Firstly, these energies have increased in power due to changes in the lowering of the magnetic field of the Earth and the Sun and secondly, the sensitivity of people is increasing due to the increasing cosmic energy we are receiving.

The two incidences I have come across in the last few weeks came when I have been checking people's homes in my location checks (<https://roryduff.com/location-check/>). In each case there has been an intersection of these Benker lines in the bedroom and in both cases the people sleeping there have been suffering from chronic pain and illness. You can get away with sleeping on these intersections occasionally (except if you are very sensitive) but the problems come when you sleep on these energies for a few months or more.

This is actually quite a well-known problem amongst geobiologists who do these home checks for their customers and the solutions are fairly simple in most cases – moving the position of a bed is one and putting certain crystals on the intersections also helps as it disseminates the concentration of energies and spreads them out into the room so the effect is much lessened.

However the new learn for me recently was one other side effect which should give much cause for concern. It seems that if you are unaware of these energies, the body has a built in mechanism to stop as much of this adverse energy getting into the body as possible. It seems the body has a natural built in form of self-defence.

This might seem all well and good and that you are getting a natural form of protection. There is a downside though. It seems now that, where a body has blocked bad energy coming up from the Earth and into them, an energy blockage results that also blocks **all** energy coming up and into them.

This is now very serious when it comes to self-healing and meditation. We need good energies to get into our bodies – both from above us and from below us. This happens subconsciously and also consciously when we meditate. However we may well be unaware of any of these natural energy blockages that have been put in place and why they have occurred. If we have no idea of how they occur, clearing a blockage will only be short term because as soon as we go back to sleep on these Benker line intersections, the blockage will return.

Even the effectiveness of meditation can be impaired to the extent that we think we can be drawing energy in and sending it out into others and to the World when, in reality, all we end up doing is sending energy out and depleting our own stores of energy.

This is a classic early healer problem. New Healers are often drained by their work as they have not yet learnt to fully open their channels to allow energy freely in and then out to do the work that they have every good intention of doing. (Note to all

new or 'wannabee' Healers – do not send energy into Tumours – it helps them grow).

So if in doubt, check it out.

Onto something more positive now -as you know I have been mapping the major lines in the USA. These last two weeks, I have been requested to look into the Sedona region of Arizona. Many who go there, and those who live there, report just how much energy is found there.

Curious about this, and as the major lines I was mapping were heading in that direction, I decided to look into it in more detail. My first surprise were that no type 4 or type 5 lines actually run through the central Sedona region. The type 5 Emperor Dragons I knew were not heading that way, but I did expect the St Michael and St Mary type lines (The type 4's) to be running through the region. Investigating further I began to see why.

The region is known for its Vortexes and as I was soon to learn, these are no ordinary places where Energy lines intersect. What is normally found with common strong intersections is that they are symmetrical in that they have equal pairs of different types of lines all crossing over in one point. These naturally have vortexes within them when each group of lines come into harmony.

There are however a few times when just lines, from one particular group of lines only, all cross over each other. In other words – just type 1 lines, or just type 2 lines.

These are a much rarer occurrence and when you do find these places, you get a very different feeling when you meditate on them. It seems that the main Vortexes in Sedona are all like this. In terms of my classification of Nodes into just Symmetrical and Asymmetrical, I feel there is now a further classification in a sub category of symmetrical nodes which can be called Large Vortexes. These are not the same though as the smaller vortexes we find within normal nodes that form when the individual flow directions in the bands become neutral and naturally create small spirals. These spiral flows are found often, and fleetingly, within large nodes. Typically they are also found both inside the stone circles and associated with the standing stones themselves and they have a wonderful vertical movement to them as well.

Having mapped these energy lines at Sedona and seen how they intersect at the key Large Vortex sites, I am very thankful to a lovely lady called Shan that I recently met who has ensured me that these maps will reach the right people living in Sedona. For

more details on these things, how they form, when they form and how to find them, you will need to do my dowsing courses.

## **2. Awakening Consciousness news**

In a recent Social media post, I discussed Prophecy rock. (This is the image at the front of this newsletter). It is a sandstone boulder near the town of Oraibi in the four corners area of Arizona. The Hopi legend says that it was etched as a petroglyph as a result of a vision an Elder had about the coming end of the fourth age and the beginning of a new golden age. I won't go into it again in detail as you can read the post on my social media sites. However it does talk about the fourth age ending with a 'mighty breath of wind' and a 'great purification'. Some people will survive this and the others will not continue to live in this World – but instead another one. I am not wanting to say too much about this at the moment, aside from several very connected people each saying to me similar things on what will happen, but I want to draw your attention to two things which are different but yet still, I think, are actually related.

Both of these two things, I think, are natural reoccurring physical phenomena.

The first is possibly connected to long term cycles of the Sun – probably like mini nova's or large Solar flares.

The second of these two things is a long term cycle of waves of cosmic energy – probably connected to a capacitor like discharges in Active Galactic Nucleii.

The timing of these two seems, to me, to be very much connected. The first comes when the cosmic super wave hits us and the second comes a little later after a resulting reaction between the Sun as the super wave when it hits the Sun. How much of a gap in time occurs between the two, I have no idea - maybe a few hours or even a day or two.

How physically damaging the reaction from the Sun will be, I also do not know. It may be small and short-lived, like a large solar flare, which will only affect the Earth facing side of the Sun, or it may be larger, like a mini nova, which will last longer and affect a greater area of the Earth.

Being underground for a few months during this maybe seem like a good idea, but perhaps also not. This, I think, is the choice that is presented to us in prophecy rock. Do we hide underground and miss the cosmic superwave and any solar activity, or

do we stay on the surface and take in its possible benefits from the huge wave of cosmic energy?

It seems we will be hit first by the cosmic super wave. We must remember at this point that this super wave has its own Bow shock wave (see post 196). This is already being seen, and felt, and we are getting a build-up in the levels of energy now from the initial smaller bow shock waves. These smaller waves will build in intensity right up to the point when the massive wave hits us. If we learn to cope with these smaller waves (like learning to ride the wave), we will be better prepared and conditioned for the larger and larger ones right up to the big one.

If the prophecies are right, the main one should hit is in 2024/2025.

The question I want to put to you, and which I would like you to think about, is this:-

What do you think a huge wave of cosmic energy do to our minds if we have prepared for it between now and then through group meditation and building awareness of the changes that brings?

If you think the answer has a positive outcome and is one that our ancient ancestors have been trying to tell us about (Re – A golden age outcome), then what should or will you do now?

For me, my work is all about this. We must get more people aware of this so they can make this choice themselves. As I wrote earlier, I think this is the same choice that we have been shown on Prophecy rock which has been outlined to us in a petroglyph.

For that reason alone, I would ask you to share my work with as many people as you can. Share the digital pdf of my posts, Share the video links on my website and even read my books and recommend them to others.

We must get more people praying and meditating together on key sacred sites on key harmony times. That way we will awaken our consciousness and be ready for what is coming.

### **3. Science News**

Back in my August newsletter, I mentioned about going to a Dynamic Earth convention at the University of Bath. I am pleased to say that videos have been now

produced that cover their amazing findings. Firstly the Safire project video is found via this link <https://www.youtube.com/watch?v=DTaXfbvGf8E&t=1s> (48mins)

Wal Thornhill and the Thunderbolts project have also done two great videos of their achievements – part 1 is here:- <https://www.youtube.com/watch?v=FohQsaxf4ho> (14mins) Part 2 is here:-

[https://www.youtube.com/watch?v=7znD0VDhPJU&fbclid=IwAR1cx5b2TEFJKmEVw41xwWNo5XqM\\_qn1uJSORqPn-q0cbPBlq0jGMrb\\_n7s](https://www.youtube.com/watch?v=7znD0VDhPJU&fbclid=IwAR1cx5b2TEFJKmEVw41xwWNo5XqM_qn1uJSORqPn-q0cbPBlq0jGMrb_n7s) (12mins)

I love the point when Wal says the Sun is 'not a camp fire in the Sky' when stating that the fusion model of the Sun being a hydrogen reactor has been disproved.

Also in Wal Thornhill's videos, he pours further scorn on relativity theory and the big bang theory. My guess is that he has read the book I gave him on Ron Pearson's Big Breed theory of the creation of the Universe as similar phrases were used in both the book and this video.

So why is this all important to us? Well it is all about finding the truth in a World where the truth is being deliberately suppressed for a variety of reasons. The main one though is to keep those in control and in power – in continual control and power.

These breakthroughs mentioned in this video could be a game changer. Having said that, one thing we were told at the conference they had found out about, was just too hot to put into the video. It hints at it when it talks about the sudden extra power output their laboratory model of an Electric Sun. It seems that these outbursts of energy (similar to large solar flares and mini nova) actually provide more energy out than is actually being put in – work the implications of that out for yourselves.

Another reason their work is of interest is that the Electric Universe shows how energy can travel along interstellar magnetic bridges between galaxies. Energy in Space will and does reach us and this will have an effect on our environment. One of these effects will be evidenced via changes in the Energy lines – something we are seeing. The other major effect is on our weather. You see our weather is affected by changes going on in Space. One example of this is cosmic energy. Look up Professor Svensmark and his research on how cosmic energy leads to cloud creation. More cosmic energy – more clouds – more cold spells on earth as clouds stop heat from the Sun getting to us.

#### **4. Social media news**

Many of you have now downloaded the digital pdf I have put together that consists of my first 200 social media posts – so a big ‘thank you’ for that and to those of you who have shared it with your friends. For those of you who have gone further and given me positive feedback – thank you too. For those still to download it you can find it here:-

<https://roryduff.com/the-geobiologist/>

Sometimes I have no idea where my next post is coming from. It may seem like I plan these posts months ahead, but that is not the case. The relevant information just seems to come along at the right time. If you intuitively feel you would like to share a topic with me though, that you feel I should cover, please do let me know.

#### **5. Courses, Seminars, Workshops news**

Since my last newsletter, we had our Autumn Equinox World harmony day – as usual held the day before the equinox as that is when all the energy lines move into harmony. There were over 40 of us at the top of Glastonbury Tor and we were joined by people from as far away as Australia – in person and in groups who were meditating with us over there. There were several groups doing the same in various states around the USA on some of the new lines that have been rediscovered. There were also several groups meditating on sacred sites here in the UK and in Europe. It may be small numbers so far, but it will make a difference. Over time, it will grow and it will then make a huge positive difference to the World – indeed I sometimes think that this is now the only thing left that will and can make a positive difference with everything that is going on – so please do continue to do these things.

Next one coming is the Winter Solstice. I will be at Stanton Drew stone circle for that one. Saturday 21<sup>st</sup> December – midday wherever you are. As the World spins, the wave of energy will build as more groups tune in.

The last level 1 dowsing course will be run on the 13<sup>th</sup> October in Bath. There are still a couple of places, so do let me know if you are interested and have any questions.

For anyone who has done any of my dowsing courses, I am also running a special dowsing day in and around Avebury stone circle on the Saturday 19<sup>th</sup> October – just sign up on this page <https://roryduff.com/dowsing-courses/> It will be limited

numbers though so it is on a first come first- served basis. We will be touching on some higher level dowsing skills which is why it is not for beginners.

For anyone who lives in Florida who is around in early November I am running some dowsing workshops for beginners on Sunday 3<sup>rd</sup>. It will be based in Palm Coast. You will need to contact me personally for information on that one and to book on to that course.

Also in November on Saturday 9<sup>th</sup>, I will be running a special Evolution of consciousness 1 day workshop in Paterson, New Jersey. I say special because this will include new information on the energy line work I have been doing in US. This will include revealing the information on the locations of some the type 4 energy line that cross over the Atlantic and which enters the States. We already know that people have an affinity with locations along an energy line – especially when they live close to one. You might be surprised to find where your nearest line can be found the other side of the Atlantic and the amazing sites it connects up to.

Again you will need to make contact with me on that workshop as I will then put you in touch with the Organisers. 30 places I am told and nearly all of them have been pre-booked in one block booking.

A few of you have also contacted me to say you are interested in coming along on my Spain trip next year. It will be a party of 8 and I have 5 very keen so far. If I get more people I will run two parties over two weeks. Dates are likely to be in July but I am waiting confirmation on hotel accommodation. Full information will be up on my website though before the end of the year. If you are keen to come along, do email me and I will add you to the list. We will be visiting La Bas Tida, the Emperor Dragon 1<sup>st</sup> Order node and Caravaca de la Cruz and the Templar window where I will give you a full interpretation of all the features and symbols in the chapel. Several other sides and workshops and dowsing days will be included in the week.

## **6. Book news**

I had hoped to release my new novel 'The Grail Hunter' during September. However with the release of the digital pdf and the extra time it took to put in over 500 hyperlinks and due to a last minute addition to the cover of the novel, I have delayed its release a few days.

What I have now decided to do is to release it just to readers of this newsletter on the 1<sup>st</sup> October. Others will have to wait for a few more weeks.

In addition to this, I would like to ask for your help and in return offer one of you a prize for the best review of this book. I would also like to post all reviews on the Grail Hunter page of my website. The prize will be a choice of having a free day of dowsing with me on one of my level 1 courses in Bath next year or to receive any two of my books for free. All I need is the reviews of the book to be done by the end of November.

To order an advance copy of my novel The Grail Hunter please go to this page:-  
<https://roryduff.com/the-grailhunter/>

## **7. Extra**

It's already been a long enough newsletter this month – so nothing extra to report this time. All the very best and thanks for your time reading this.

For discounts off Location checks, Seminars and my Dowsing courses, please click here to go to the discount page on my website <https://roryduff.com/discount-payment-page/>
